

HECTOR J. HERRERA

Senior Data & Analytics Engineer | Data Science

Ireland • +353 871 864 406 • herrerae.hj@icloud.com • [linkedin.com/in/herreraespinolahj](https://www.linkedin.com/in/herreraespinolahj) • [Portfolio](#) • Full Work Eligibility

PROFESSIONAL SUMMARY

Analytics Engineer with over 5 years of experience building reliable data infrastructure, BI solutions, and end-to-end reporting pipelines across healthcare, legal insurance, FMCG, and manufacturing sectors. Proven track record designing scalable DBT data models, cloud-based pipelines, and executive dashboards that drive business performance and enable stakeholder self-service. Skilled in Python, SQL, DBT, and Snowflake, with hands-on experience in Azure (Data Factory, Synapse, Databricks), advanced data modeling (star/snowflake schema, OBTs, SCDs), and data quality frameworks including contracts and validation checks. Experienced applying AI tools to data workflows — including cloud AI and emerging AI platforms — to automate pipelines and improve data accessibility. Strong background in data governance, compliance data, cross-functional collaboration, and mentoring. Fluent in Spanish and English, with intermediate Portuguese.

CORE COMPETENCIES

Analytics Engineering • Data Modeling (Star/Snowflake Schema, OBT, SCD) • Data Quality & Contracts • Compliance & Regulatory Data • Pipeline Development & Automation • AI-Driven Workflows • Data Governance • Stakeholder Management

DBT • Snowflake • Python • SQL • Azure (Data Factory, Synapse, Databricks) • Airflow • Power BI • Sigma • Tableau • Fivetran

PROFESSIONAL EXPERIENCE

Datavant | Ireland Jan 2026 – Present

Senior BI / Analytics Engineer

- Design and maintain DBT data models (staging, intermediate, mart layers) in Snowflake; translate complex compliance and legal insurance requirements into clean, tested, well-documented SQL transformations with data contracts and validation checks.
- Build and maintain Sigma dashboards supporting executive and operational decision-making across Finance, Product, and Operations teams in healthcare and legal insurance domains.
- Integrate data from multiple source systems including HealthSource, Salesforce, NetSuite, Stripe, and SaaS platforms via Fivetran; debug data quality issues and investigate lineage across multi-source environments.
- Apply AI tools to automate data workflows and pipeline generation; collaborate cross-functionally to define metrics and surface insights to both technical and non-technical stakeholders.

Kenvue | Ireland Apr 2025 – Dec 2025

Senior Business Analyst

- Partnered with the Digital Transformation Office to design and deliver BI reporting solutions aligned with global strategic initiatives.
- Led development of Power BI dashboards and automated reporting pipelines, providing executives with real-time KPI visibility across multiple business units.
- Drove data governance and quality initiatives ensuring accuracy, integrity, and security of data used for strategic decision-making.
- Collaborated with IT and business stakeholders to evaluate and integrate Azure and Databricks analytics platforms, improving scalability and reporting performance.

Johnson & Johnson | Ireland (via Réalta Technologies) Jul 2023 – Apr 2025

Data Engineer

- Built data pipelines ingesting manufacturing, compliance, and inventory process metrics; performed ETL using R, Python, Alteryx, and SQL across internal and cloud-based systems.
- Reduced inventory costs by 25% in Asia-Pacific by identifying excess stock and implementing a batch expiration-based prioritization strategy.
- Accelerated EMEA dashboard performance by 30% by migrating R scripts to PySpark within Databricks.
- Delivered monthly Power BI training to groups of 15–20, increasing data literacy and reporting efficiency across the organization.

Outer Rim | Ireland Oct 2022 – Jun 2023*Data Analytics Engineer*

- Built and refined Python-based ETL pipelines, reducing query processing time by 8% and improving data accessibility across systems.
- Increased data reliability by 7% through robust data validation techniques within ETL workflows.
- Delivered data-driven reports and interactive visualizations using Power BI and Tableau, uncovering actionable customer insights from web analytics, social media, and CRM data.

NatureSweet | Remote Mar 2022 – Oct 2022*Data Analyst*

- Improved master data accuracy by 80% by developing and maintaining Power BI dashboards to monitor data quality and track anomalies.
- Defined and maintained MDM Standard Operating Procedures (SOPs); performed UAT for MDM systems and supported ad-hoc master data requests.

Mercado Libre | Argentina Dec 2019 – Dec 2021*Data Analyst — Procurement Operations*

- Led data analysis projects for the procurement department using Python (Pandas, NumPy, Matplotlib) to clean, transform, and analyze large datasets.
- Achieved 15% cost savings by implementing statistical algorithms to identify supplier performance trends and cost-reduction opportunities.
- Built interactive Power BI dashboards delivering procurement performance insights to key stakeholders; applied predictive modeling to forecast demand and optimize inventory.

The AES Corporation | Argentina Aug 2018 – Dec 2019*IT Sourcing Team Leader*

- Led IT Purchasing Department of 4 professionals across the Americas region, managing all contracts over \$400K and spearheading unification of regional purchasing departments into a single Argentina-based operation.
- Identified \$1.2M in annual savings through procurement data analysis; standardized laptop acquisition across all countries in the region.

Earlier experience (2012–2018): Petronas Lubricants — Direct & Indirect Procurement Manager, set up procurement department from scratch, managed \$2M annual purchasing volume across 3 countries, 8% cost savings on energy plant project.

IBM — Strategic Sourcing Buyer across 7 countries, awarded IBMer of the Quarter Q4 2013 for outstanding contract negotiation (20% cost savings identified).

TECHNICAL SKILLS & LANGUAGES

Programming	Python (Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn, SciPy, PySpark), SQL, R, C# (basic)
BI & Viz	Power BI (DAX, Power Query), Sigma, Tableau (VizQL), MS Excel (Advanced: Pivot, Macros, VBA), Alteryx
Data Eng.	DBT, ETL pipelines, Fivetran, Airflow, Snowflake, Azure (Data Factory, Synapse, Databricks), AWS (foundational)
ML / DS	AI — Machine Learning (Linear & Logistic Regression, Decision Trees, SVM, K-Means), Predictive Modeling, Cloud AI Tools, AI-driven Workflow Automation, Prompt Engineering, EDA
ERP	SAP (MM, SD), Oracle ERP
Other	Git (GitHub, Bitbucket), CI/CD, JIRA, Confluence, Agile / SCRUM
Languages	Spanish (Native) • English (Fluent) • Portuguese (Intermediate) • Japanese (Basic)

EDUCATION

Universidad Tecnológica Nacional – BS Industrial Engineering Dec 2016

Henry (Soy Henry Bootcamp) – Higher Diploma in Data Science & Machine Learning — 800+ hours Sep 2022 – Feb 2023

EducacionIT – Unity Game Developer — C# & Unity, 100+ hours Apr 2024 – Aug 2024

CERTIFICATIONS & AWARDS

Python for Everybody Specialization (University of Michigan / Coursera) • Supervised Machine Learning: Regression & Classification • Capstone: Retrieving, Processing & Visualizing Data with Python • Negotiation Skills (IBM) • IBMer of the Quarter — Q4 2013 (awarded by CEO, IBM Argentina) • "Competing as a Team to Win" Recognition (awarded by CEO, Mercado Libre)
