

HECTOR J. HERRERA ESPINOLA

Senior Data & Analytics Engineer | Data Science

Ireland • +353 871 864 406 • herrerae.hj@icloud.com • [linkedin.com/in/herreraespinolahj](https://www.linkedin.com/in/herreraespinolahj) • [Portfolio](#) • Full Work Eligibility

PROFESSIONAL SUMMARY

Analytics Engineer with 5+ years of experience building data infrastructure, DBT data models, and end-to-end BI solutions across healthcare, legal, FMCG, and manufacturing. Proven track record delivering scalable pipelines and executive dashboards that drive business performance and enable stakeholder self-service. Skilled in Python, SQL, DBT, Snowflake, and Azure, with strong foundations in dimensional modeling and data quality frameworks (contracts, validation checks). Operates with an AI-augmented workflow, using LLMs to accelerate pipeline development, automate documentation, and shorten time-to-insight. Combines engineering rigour with commercial instinct built over 10 years in procurement, sourcing, and supplier negotiation, bringing first-hand understanding of pipeline management, forecasting, and commercial KPIs to analytics work. Fluent in English and Spanish; intermediate Portuguese.

CORE COMPETENCIES

Analytics Engineering • Data Modeling (Star/Snowflake Schema, OBT, SCD) • Data Quality & Contracts • Compliance & Regulatory Data • Pipeline Development & Automation • AI-Driven Workflows • Data Governance • Stakeholder Management
 DBT • Snowflake • Python • SQL • Azure (Data Factory, Synapse, Databricks) • Airflow • Power BI • Sigma • Tableau • Fivetran

PROFESSIONAL EXPERIENCE

Datavant | Ireland Jan 2026 – Present
Senior BI / Analytics Engineer

- Built and maintained reusable DBT data models powering the core reporting layer, implementing data contracts and validation checks that catch quality issues before they reach stakeholders.
- Designed and delivered scalable BI dashboards in Sigma for the Legal and Insurance business units, establishing the primary self-service reporting layer for cross-functional teams.
- Integrated LLM-assisted workflows into daily analytics work, accelerating SQL development, automating DBT model documentation, and reducing turnaround on ad-hoc analysis from days to hours.
- Conducted exploratory and ad-hoc analysis using SQL and Python to surface trends, anomalies, and business opportunities, translating findings into actionable recommendations.
- Partnered with finance, operations, HR, and compliance stakeholders to translate business requirements into analytical solutions, collaborating with data engineering to ensure integrity between source systems and the reporting layer.

Kenvue | Ireland Apr 2025 – Dec 2025
Analytics Engineer

- Retained through the J&J Consumer Health spin-off into Kenvue, embedded within the Digital Transformation Office to deliver analytics engineering solutions at global scale.
- Delivered Power BI dashboards and automated reporting pipelines, giving executives real-time visibility into KPIs across multiple business units.
- Led data governance and quality initiatives for strategic reporting, defining standards for accuracy, integrity, and security of executive-level data.
- Evaluated and integrated analytics platforms (Azure, Databricks) with IT and business stakeholders, improving scalability of the global reporting architecture.
- Trained business users on BI tools and data best practices, accelerating self-service adoption across business units.

Johnson & Johnson | Ireland (via Réalta Technologies) Jul 2023 – Apr 2025
Data Engineer

- Built data pipelines ingesting manufacturing, compliance, and inventory process metrics; performed ETL using R, Python, Alteryx, and SQL across internal and cloud-based systems.
- Reduced inventory costs by 25% in Asia-Pacific by identifying excess stock and implementing a batch expiration-based prioritization strategy.
- Accelerated EMEA dashboard performance by 30% by migrating R scripts to PySpark within Databricks.
- Delivered monthly Power BI training to groups of 15–20, increasing data literacy and reporting efficiency across the organization.

Outer Rim | Ireland Mar 2022 – Jun 2023*Data Analytics Engineer*

- Designed and maintained end-to-end ETL pipelines using Python and SQL to ingest, transform, and load data from multi-source environments, including web analytics, CRM, and social media platforms — into a centralized data warehouse, enabling reliable and scalable data consumption across business units.
- Modeled and structured datasets to support BI consumption layers, establishing data quality standards and governance practices that ensured consistency, accuracy, and integrity across all downstream reporting — contributing to an 80% improvement in master data reliability.
- Built and delivered self-service dashboards in Power BI and Tableau, translating complex, multi-source datasets into clear, actionable narratives aligned with business KPIs — empowering stakeholders to make faster, data-driven decisions.
- Collaborated cross-functionally with Business Intelligence and IT teams under Agile methodologies, contributing to sprint planning, pipeline documentation, UAT processes, and data governance frameworks.

Mercado Libre | Argentina Dec 2019 – Dec 2021*Data Analyst — Procurement Operations*

- Led data analysis projects for the procurement department using Python (Pandas, NumPy, Matplotlib) to clean, transform, and analyze large datasets.
- Achieved 15% cost savings by implementing statistical algorithms to identify supplier performance trends and cost-reduction opportunities.
- Built interactive Power BI dashboards delivering procurement performance insights to key stakeholders; applied predictive modeling to forecast demand and optimize inventory.

The AES Corporation | Argentina Aug 2018 – Dec 2019*IT Sourcing Team Leader*

- Led IT Purchasing Department of 4 professionals across the Americas region, managing all contracts over \$400K and spearheading unification of regional purchasing departments into a single Argentina-based operation.
- Identified \$1.2M in annual savings through procurement data analysis; standardized laptop acquisition across all countries in the region.

Earlier experience (2012–2018): Petronas Lubricants — Direct & Indirect Procurement Manager, set up procurement department from scratch, managed \$2M annual purchasing volume across 3 countries, 8% cost savings on energy plant project. IBM — Strategic Sourcing Buyer across 7 countries, awarded IBMer of the Quarter Q4 2013 for outstanding contract negotiation (20% cost savings identified).

TECHNICAL SKILLS & LANGUAGES

Programming	Python (Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn, SciPy, PySpark), SQL, R, C# (basic)
BI & Viz	Power BI (DAX, Power Query), Sigma, Tableau (VizQL), MS Excel (Advanced: Pivot, Macros, VBA), Alteryx
Data Eng.	DBT, ETL pipelines, Fivetran, Airflow, Snowflake, Azure (Data Factory, Synapse, Databricks), AWS (foundational)
ML / DS	EDA, Linear & Logistic Regression, Decision Trees, SVM, K-Means, Predictive Modeling
ERP	SAP (MM, SD), Oracle ERP
Other	Git (GitHub, Bitbucket), CI/CD, JIRA, Confluence, Agile / SCRUM
Languages	Spanish (Native) • English (Fluent) • Portuguese (Intermediate)

EDUCATION

Universidad Tecnológica Nacional – BS Industrial Engineering Dec 2016

Henry (Soy Henry Bootcamp) – DataScience & Machine Learning Bootcamp— 800+ hours, full-time Sep 2022 – Feb 2023

EducacionIT – Unity Game Developer — C# & Unity, 100+ hours Apr 2024 – Aug 2024

CERTIFICATIONS & AWARDS

Python for Everybody Specialization (University of Michigan / Coursera) • Supervised Machine Learning: Regression & Classification • Capstone: Retrieving, Processing & Visualizing Data with Python • Negotiation Skills (IBM)

IBMer of the Quarter — Q4 2013 (awarded by CEO, IBM Argentina) • "Competing as a Team to Win" Recognition (awarded by CEO, Mercado Libre)
